fourth school year

The results of the previous school year are sent by the teachers to the C.A.P., Centre D'animation Pédagogique, in Kati.
Teachers propose a list of pupils who move on to the next school year.

The C.A.P. evaluates each student's school results and decides if the promotion should be accepted or not.

The 2024-2025 school year went well.
However, there was a significant number of school dropouts due to

- a low number of school-aged children
- the relocation of some families to other villages
- the yearly school fee of €8,40 per child, which not all families can afford

The 2025-2026 school year began on October 5, with 70 pupils

first school year, 15 pupils
second school year, 10 pupils
third school year, 10 pupils
fourth school year, 12 pupils
fifth school year, 23 pupils

First school year enrollment continues until the end of the month.

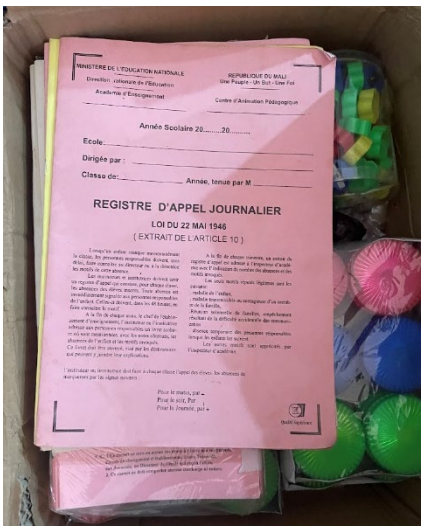
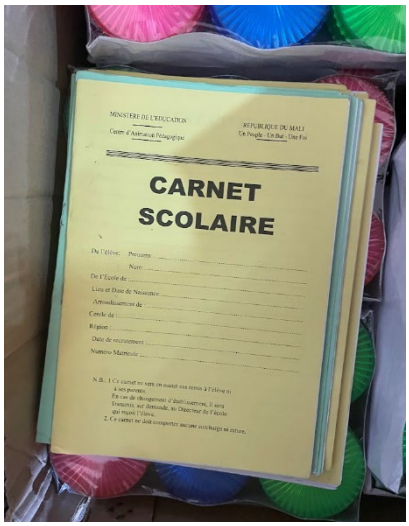
Soutrama





School supplies for the new school year are purchased in Kati, and transported to Djamballa via *Soutrama*, the typical eight-seater bus of Mali.

Akelius language course

In the past school year, a small group of students started using the Akelius French course as an auxiliary tool for learning the language taught in the village.

The tablets arrived in Djamballa

the first-grade teacher of Djamballa

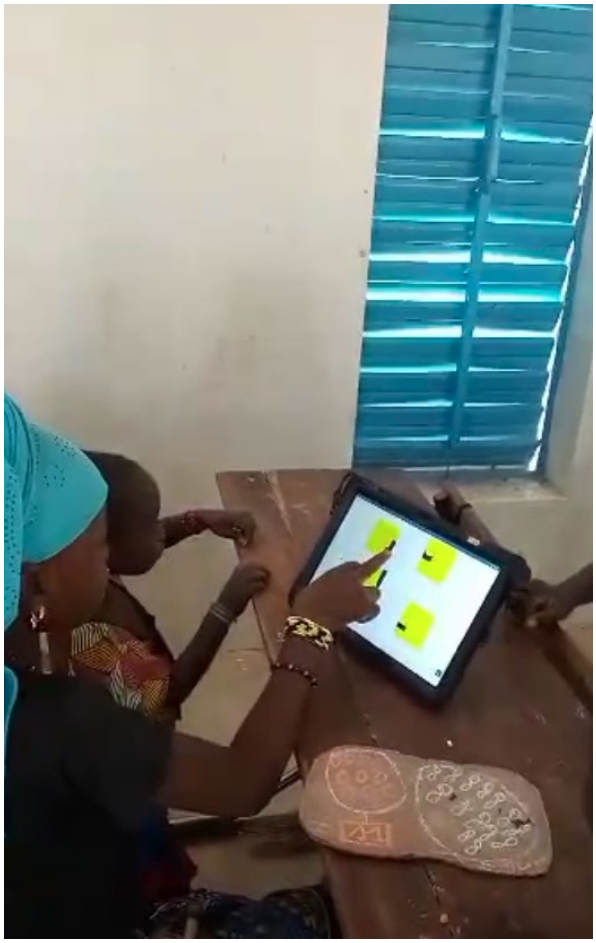
online course onboarding

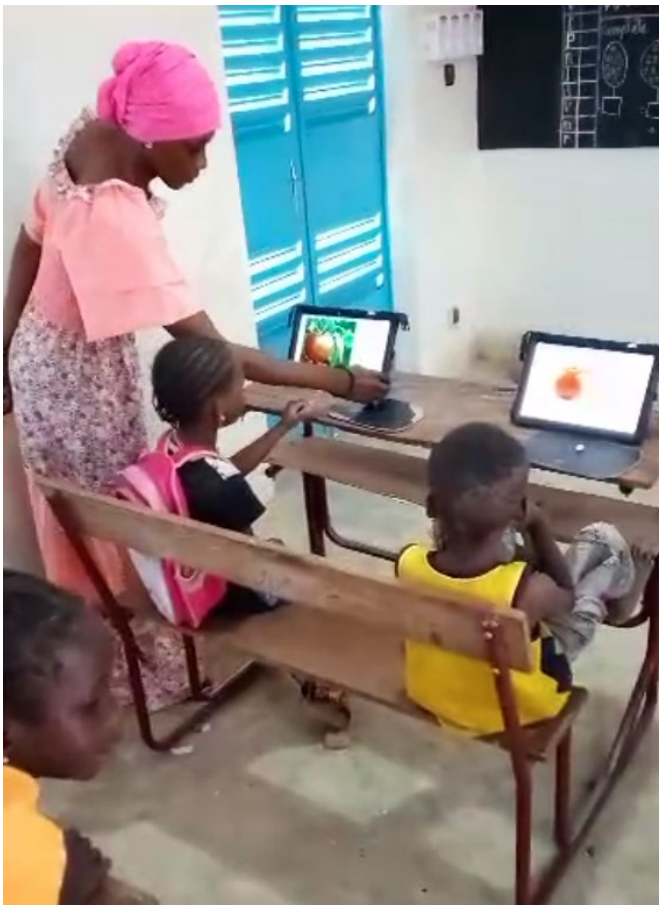
After a week of onboarding on the online course and overall usage of the program,
the teacher introduced the tablets into the classroom.
The course was piloted during the last three months of the school year.
The tablets were used by ten first-year grade students,
aged six to seven, divided into two groups.

Classes took place two days a week in the afternoon, after regular school hours, for a total of four hours per week per student.

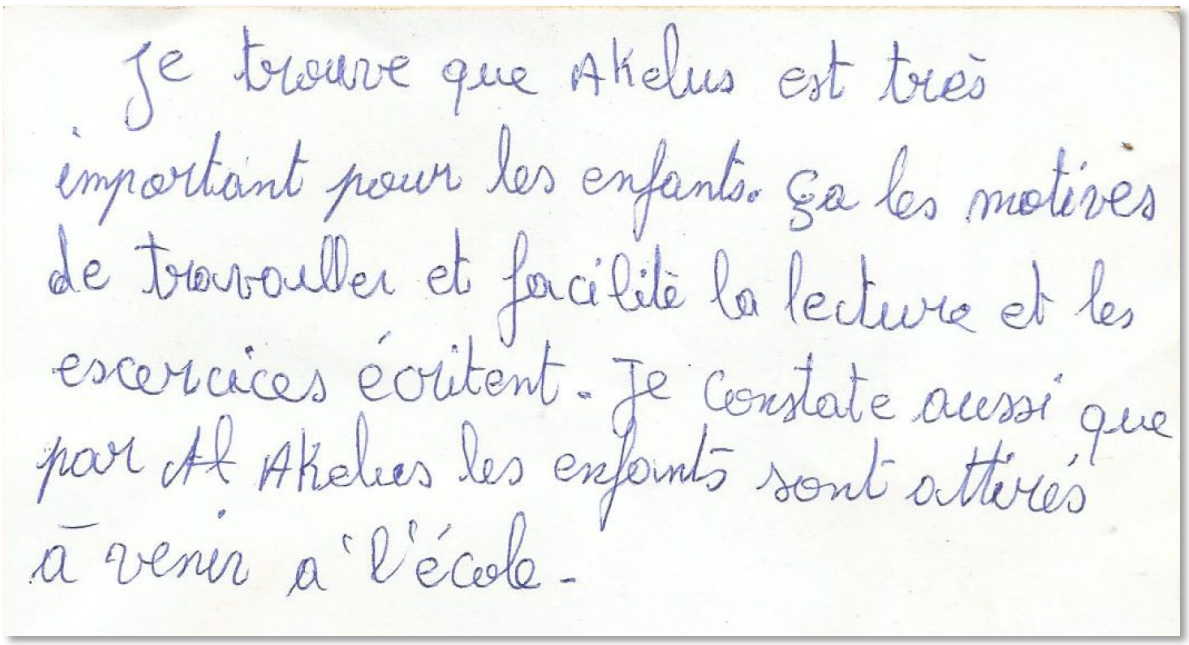
What is a tablet?
The children in the village of Djambala had never seen a tablet.
Many of them do not even know what a mobile phone is.
The first step was getting familiar with the device.
Each student made their own tablet out of a piece of cardboard.
They drew the screen and the keys.
They started drawing on the screen an apple, the letter *m*, and a potato.

After one week, they started using the tablets,
working in pairs on one device, the older child helped the younger one.





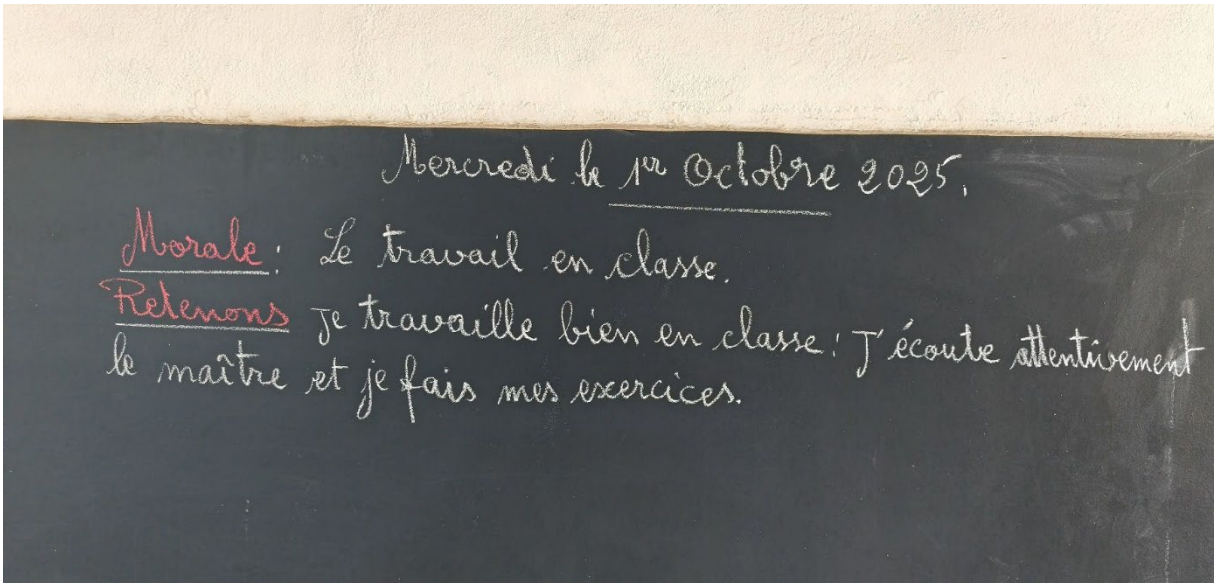
After three months of lessons, the teacher observed a good improvement in both written words and pronunciation.
We received the following comment from her,



Je trouve que Akelius est très important pour les enfants. Ça les motives de travailler et facilité la lecture et les exercices écritent. Je constate aussi que par Al Akelius les enfants sont attirés à venir a l'école.

I believe that Akelius is very important for the children, as it motivates them to work, facilitates reading and writing exercises.
I have also observed that, thanks to Akelius, the children are more encouraged to attend school.

October 1st, first day of school



Teachers form the classes and provide each student with the school materials.

This year, Djambala has three teachers who will oversee the five classes using the double-shift system, with lessons held both in the morning and in the afternoon, as is standard in the rural school system.

current condition of the school buildings

The condition of the buildings is still very good.
The outdoor area, after the rainy season, is somewhat overgrown.
The school belongs to the students,
they will take responsibility for cleaning and maintaining the space

teacher´s apartment

The villagers built a kitchen with traditional materials, serving the teacher´s apartments

school and teachers' latrines
