

UNICEF São Tomé e Príncipe

2023-09-28

Yesterday, September 27th, the National Digital Learning Program (PNAD) celebrated the beginning of the school year at Escola Básica Adr., in Neves.

With the collaboration of the school's director, counselors and teachers, digital learning activities were developed with around 150 children from the 1st and 2nd Classes.

Literacy was worked on, with the introduction of the alphabet in an interactive way, and numeracy, with the review of mental calculation, through the use of the Akelius application.

Playful-pedagogical activities were also developed with all the children at the school.

Escola Básica Adriano Moreira is one of the PNAD pilot schools in São Tomé, in which UNICEF-STP contributed to the creation of an Akelius Digital Laboratory, so that children and the educational community of Neves have access to an education inclusive and quality, with the possibility of using the internet and digital media.

PNAD is a Program of the Ministry of Education, Culture and Sciences - São Tomé and Príncipe, with the support of UNICEF São Tomé and Príncipe
