

👍👤 [JU OS "Harmani II"](#) in Bihać is one of the six schools in the area of the Una-Sana Canton where foreign language learning has been implemented in the past few years with the help of the Akelius digital platform.

This platform offers different methods of learning foreign languages and is favorite among the youngest because it introduces them to foreign languages in a fun and dynamic way.

👍✅ Foreign language teachers in these schools, during their lessons, show by example how useful and efficient it is to use the Akelius digital platform, because working with students is much more creative and makes it extremely easier to adopt their knowledge.

Thus, teacher Mirela, by her example, encourages others to use the Akelius digital platform as well as the use of digital aids within the teaching process, adapting the entire teaching process to today's dynamic environment in which children live and learn.

👍👤 [UNICEF Bosna i Hercegovina](#) and Save the Children for the Northwestern Balkans continue to provide technical support to schools and teachers as well as support in the form of procurement of equipment and devices for the smooth running of English and German classes with the help of the Akelius digital platform.
