

Akelius Foundation

Akelius Math AB for learning mathematics

Akelius Foundation has founded a new subsidiary, Akelius Math AB.

Akelius Math AB, Chalmers University of Technology, and University of Gothenburg develop Akelius Math Learning Lab together.

In this collaboration, teachers and scientists work together to develop education material for learning mathematics. The target group is twelve-year-olds and older.

The material will be freely available and be used in schools that lack resources and at refugee camps, for example through UNICEF and UNHCR. The material will be available in multiple languages.

Akelius Math AB is responsible and pays for the development work.

Akelius Math Learning Lab will be placed at the department of mathematical sciences, which is joint for Chalmers and University of Gothenburg.

Samuel Bengmark, associate professor at the department of mathematical sciences, will be the head of the lab and CEO of Akelius Math AB.

Akelius Foundation donates SEK 20 million over a five-year period to Chalmers.
