

Save the Children in North West Balkans

2023-12-29

Akelius digital platform for learning foreign languages is more than an online application, it represents a real community that brings together teachers, children and parents.

This digital platform primarily motivates teachers to use it as much as possible in classes as an interactive tool for learning foreign languages, and with its help, children connect, learn and grow together.

By using the Akelius digital platform, our youngest are encouraged to show the learned knowledge to their loved ones as much as possible.

The end of this year was precisely the opportunity for students from project primary schools from the Una-Sana Canton to gather and demonstrate to their parents what a lesson looks like on the Akelius digital platform.

On that occasion, they showed how much learning foreign languages means to them with songs, games, laughter and socializing, and they sang the song "Meine Familie (My Family)" to their parents. In the end, the students wished to continue their association with the Akelius platform in the following year.
