With the support of the United Nations Children's Fund (UNICEF) of the Republic of Kazakhstan, the initiative to improve the language literacy of children during migration processes continues in the city of Shymkent.

Modern tablets, headphones and textbooks were purchased for learning English based on the Akelius platform. These educational materials are at the stage of distribution among the schools participating in the project.

"Sana Sezim" PSC employees handed over all the necessary materials to the 122nd ЭББМ. We are sure that new methods and equipment will help children learn English more effectively and will open up many new opportunities for them.

We remind you that this initiative was piloted in Astana, Almaty and Shymkent in 2021. In 2021-2023, more than 120 children in the city of Shymkent participated in the initiative. The data showed that the program not only helped children learn school subjects, but also increased their confidence in peer relationships and social integration and adjustment. In addition, school teachers have improved their skills in the use of technology in education, blended learning, and a differentiated approach in the classroom.
