## Save the Children in Northwest Balkans

Children's smiles, joy on their faces and the desire to learn new words every day tell us that the Akelius digital platform for learning foreign languages is a hit in the education of the youngest.

With the help of the Akelius digital platform for learning foreign languages, children are enabled to express themselves creatively and express their emotions.

The game is also the biggest motivation for students during these classes, because it is with the help of the game that children learn the most and practically use their knowledge of foreign languages.

So the students from the Una-Sana Canton could hardly wait to celebrate the first International Game Day in the Akelius digital platform for learning foreign languages class at the *Gornje Prekounje – Ripač* Elementary School.
