

2024-10-15

The Akelius initiative, this year, is also implemented in the hotel-tourism vocational high school in Tirana.

We are happy to expand the circle of the target group served by the use of the Akelius platform in the hope that it will encourage young people in vocational secondary schools to work harder on improving their knowledge of foreign languages.

Thanks to the support of the UNICEF office in Albania, the Observatory enabled the school to equip the Akelius laboratory with the most modern technological tools    for the development of foreign language learning in the most comfortable way.
