observatorybania

The "At Zef Pllumi" school in Shengjin 🏫 welcomed the Observatory in its premises for the development of the training of English language teachers in the Lezhe area, focusing on the use of the Akelius platform. The meeting was held in the Akelius laboratory, 🧑🏫💻 a space dedicated to improving students' knowledge of English, offering a practical and modern approach.

The Akelius platform 🧑🏫 has shown very positive results, not only for Albanian students, but also for Afghan students during their temporary stay in Albania. It has enabled a faster and more effective acquisition of the English language, making students more skilled in using and reproducing knowledge in a foreign language.

👉 The Akelius initiative is being implemented by the "Observatory for the Rights of Children and Youth" in partnership with [@unicefalbania](#) and in cooperation with [@ministriaearsimit](#).
