👉 Following the mentoring visits of the Akelius project, the Observatory held a meeting with English language teachers at the vocational technical school of Korçë.

🔗 The discussions focused on the practical use of the Akelius Digital Language Learning platform, which is helping teachers integrate interactive and digital methods into teaching. Through this platform, learners engage more dynamically and improve their English communication skills.

The #Akelius initiative is funded by the Akelius Foundation and implemented by **#UNICEFAlbania**, in collaboration with **@ministriaearsimit** and **@observatorialbania**.
