Minister Hota-Muminović: with the "Akelius Digital Language Course" project, we are improving the educational process.

The "Akelius Digital Language Course" training, intended for teachers who teach English in the third, fourth and fifth grades of elementary schools in Sarajevo Canton, as well as those who teach German, started today.

In her address to those present, the Minister of Education of the Sarajevo Canton, Naida Hota-Muminović, expressed her sincere gratitude to the representatives of UNICEF, who in January of this year addressed the line ministry with the aim of approving the implementation of this project, which officially came to life today.

"This project strongly confirms that all participants, in partnership with the Ministry of Education of the KS, together with the Institute for the Development of Pre-University Education, and with the support of UNICEF, have the power to improve the educational system and provide children and students in Sarajevo Canton with better and more modern approaches to learning and teaching.

The school must be competitive with the aggressive industry of entertainment, hedonism, and consumerism. We achieve this through constant innovations in the teaching process.

In this way, by our own example, we encourage students to activism, the development of creative and critical thinking and self-confidence," said Minister Hota - Muminovic.
